

CK ASSOCIATES

Disaster support for our clients associated with storm events and releases consist of utilizing our multimedia teams to conduct asset assessments to support Incident Command Structure.

Response Tasks and Objectives

Prompt collection and communication of time-sensitive data are essential.

- Evaluate condition of assets.
- Identify potential or actual releases.
- Develop recommendations and prioritizations based on risk to public, environment and infrastructure.
- Support ICS decision process.
- Monitor change through continued surveys.
- Maintain GIS tracking system.
- Maintain communication/travel safety protocols.

CK's Response Time

As soon as safe travel is possible, mobilization of the lead team will be initiated. Depending on location of assets and accessibility, the lead team can arrive within 24 hours. The support team will develop maps and other data/information needs before departure.

We coordinate with other approved client contractors and will:

- Initiate an information/data gathering effort for the area of concern, including aerial imagery, digital quad maps, natural resources and infrastructure information.
- Identify the team and equipment for the event that will include at a minimum; Senior Project Manager, Environmental Scientist, GIS Specialist
- Establish logistic team to aid in support and coordination.

The team will consist of 3 - 4 individuals depending on the geographical coverage of the assessment. Teams

consist of individuals who understand industrial operations, multimedia assessments, recovery & containment methods, natural resource surveys, GIS mapping, analytical procedures, regulatory drivers – simplistic to complex assessment procedures.

Information Needs for CK Response Team

1. Client Contact Information
2. ICS Location
3. Geographical reach
4. Safety Information
